

SIZANA FERTILITY FUND NPC

Making parenthood possible

A FORMAL OVERVIEW FOR DONORS, PARTNERS AND SUPPORTERS

Improving access to fertility care for individuals and couples in
South Africa.

South Africa

Who We Are

Sizana Fertility Fund is a South African non-profit organisation established to improve access to fertility care for individuals and couples who cannot afford treatment. Infertility affects approximately one in six people worldwide and can have profound emotional, social and financial consequences. Sizana exists to help ensure that financial circumstances are not the only barrier to building a family.

The name “Sizana” is derived from the isiZulu expression meaning “to help one another” or “let us help each other”. It reflects the belief that no one should face the journey of infertility alone.

Founded on the principle of collective support, Sizana brings together communities, healthcare professionals, businesses and donors to help remove financial barriers to fertility care and give individuals and couples the opportunity to build a family.

Our Mission

Sizana provides financial assistance for fertility investigations and clinically appropriate treatment. Funding is awarded through a transparent application process, based on financial need and clinical merit.

Fertility investigations Support towards essential investigations that help establish an appropriate care plan.	Treatment support Assistance for ovulation induction, intrauterine insemination (IUI) and in vitro fertilisation (IVF).
Fertility preservation Support for oncology patients who may need fertility preservation before treatment.	Donor treatment Assistance for donor treatment where clinically appropriate.

Who We Support

Sizana's support is intended for eligible applicants who meet the Fund's criteria. Priority considerations include:

- South African citizens residing in South Africa.
- Households with a monthly income of R30,000 or less.
- Applicants without living children.
- Women up to 42 years receiving support using their own oocytes (eggs).
- Donor egg treatment for women older than 42 years and for younger women where needed.
- Oncology patients requiring fertility preservation support.
